CAREER OBJECTIVE

Information Technology graduate currently pursuing an M.Tech in Software Engineering, with a solid foundation in Machine Learning, Deep Learning, and Full-Stack Development. Proven ability to design and build AI-driven applications, including a deep learning-based fraud detection system and a machine learning model for crop yield prediction, using Python, TensorFlow, FastAPI, and React. Looking to contribute as a Software Engineer, Machine Learning Engineer, or AI Developer.

EDUCATION

M.Tech – Software Engineering JNTUH Currently Pursuing	2025 – 2027
Bachelor of Technology in Information Technology Vardhaman College of Engineering CGPA: 8.46 / 10	2021 – 2025
Intermediate (TSBIE) TSWR Sainik School, Karimnagar 96.6%	2019 – 2021
SSC Aditya Talent School, Hyderabad 95%	2018 – 2019

EXPERIENCE / INTERNSHIPS

Salesforce Developer Virtual Internship — Salesforce	Oct 2023 – Dec 2023
- Learned Salesforce platform fundamentals, Apex programming, Lightning components, and CRM administration through guided modules. - Gained hands-on experience with cloud-based application development.	

PROJECTS

Harvesting Insights: Crop Yield Prediction Using Machine Learning Python, Scikit-learn, Pandas, NumPy, Matplotlib	6 months
- Built a crop yield prediction system using agricultural, weather, and environmental data from FAO and Kaggle, with preprocessing, feature encoding, and standardization. - Implemented and compared Linear/Ridge/Lasso Regression, Decision Tree, and kNN models; kNN performed best after hyperparameter tuning. - Achieved an R^2 score of 0.9875 and MAE of 3554.86, delivering a predictive framework to support farmer decision-making.	
Cloud-Driven Credit Card Fraud Detection Using Deep Learning Python, TensorFlow, Keras, XGBoost, FastAPI, Docker, Azure	6 months
- Built a cloud-based fraud detection system on the Kaggle European Credit Card Fraud dataset (284,807 transactions, 492 fraudulent), handling class imbalance via SMOTE. - Designed a Deep Neural Network with ReLU activations, dropout regularization, and a sigmoid output layer; deployed as a scalable cloud service. - Achieved 99.3% accuracy, 0.97 ROC-AUC, 0.92 precision, 0.90 recall, and 0.91 F1-score.	

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL, JavaScript
Web Technologies: HTML, CSS, React, FastAPI, Flask, Tailwind CSS
Machine Learning & AI: TensorFlow, Keras, Scikit-learn, XGBoost, Pandas, NumPy, SMOTE, SHAP
Databases: PostgreSQL (NeonDB), MySQL
Tools & Platforms: Git, GitHub, Docker, Linux (WSL Ubuntu), Google Colab
Cloud & Deployment: Netlify, Render

CERTIFICATIONS

- Salesforce Developer Virtual Internship Certificate

ACHIEVEMENTS

- Designed and delivered multiple AI/ML projects spanning Deep Learning and NLP, translating concepts into working, end-to-end solutions.
- Engineered full-stack web applications using modern frameworks and development practices, from design through deployment.
- Built strong, hands-on proficiency in ML model development — from data preprocessing to evaluation and performance optimization.
